

**GIS APPLICATION TO RELATE MOVEMENT OF SAVANNA
ANIMALS TO FORAGE PRODUCTION IN RUMA N. PARK
HOMABAY COUNTY, KENYA**

**BY
LUKARIA LUKE KANYI
KENYA WILDLIFE SERVICE**

PRESENTED TO THE
**Consortium for Research in East African Tropical
Ecosystems**
19th DECEMBER 2014

WHAT IS GIS

Geographic Information System:

“An organized collection of computer hardware, software, geographic data, and personnel designed to efficiently capture, store, update, manipulate, analyze and display all forms of geographically referenced information.”

from *Understanding GIS--The ARC/INFO Method*, ESRI, 1993

Geographic Information System:

“A set of tools for collecting, storing, retrieving at will, transforming, and displaying spatial data from the real world for a particular set of purposes.” from *Principles of Geographical Information Systems for Land Resources Assessment*, P.A. Burrough, 1986.

•Spatial Databases

•Maps

•Computer

•User

Application of GIS

**Data are facts which
have been recorded**

a system to convert **data** from internal and external sources into information and to communicate the **information** to managers at all levels to enable them to make timely and effective decisions for planning, directing and evaluating the activities for which they are responsible

**Information
is processed
data**

Data collection

- Only data which can be processed into information which is relevant and useful is collected and stored
- Data recording must be easy, fast and designed to minimise data collection mistakes (data entry)
- The handling of the data sheets in the field must be easy without sacrificing details required by managers
- Data recording must provide raw data for a wide range of outputs
- Standardised data collection and outputs

All data are geo-referenced using GPS

Datasheets

Patrol ID:

GROUND PATROL DATA SHEET

Date: <input style="width: 80px;" type="text"/>	Foot patrol: <input style="width: 40px;" type="text"/>	GPS no: <input style="width: 50px;" type="text"/>	Day: <input style="width: 20px;" type="text"/> of <input style="width: 20px;" type="text"/> patrol days
Patrol Code: <input style="width: 100px;" type="text"/>	Water patrol: <input style="width: 40px;" type="text"/>		

Sub No.	View-point	LOCATION	TIME	Dist. to-loc	Distance (m)	OBSERVATION CODE	TOTAL	ADULTS		Sex	REMARKS +
								M	F		

<p>OBSERVATIONS - legal activities: POACHING: POC (poaching); hunting: Hunt; Feeding: FPD, FDF PURLOIN/RETRIEVING: PD (poaching), FFD (feeder), FDF (feeder), FDF (feeder), FDF (feeder), FDF (feeder) ENCROACHMENT: Encroachment; Died evidence: DE (deceased), DE (deceased), DE (deceased), DE (deceased) Scavenging: S (scavenging), S (scavenging), S (scavenging), S (scavenging) FIRE: FI (fire), FI (fire) IMPORTANT: add further details under remarks</p>	<p>OBSERVATIONS - illegal activities: Animals: L (lion), LP (lioness), P (hyena), B (buffalo), B (buffalo), B (buffalo), B (buffalo), B (buffalo) Birds: B (bird), B (bird), B (bird), B (bird), B (bird), B (bird), B (bird), B (bird), B (bird), B (bird), B (bird), B (bird), B (bird) Reptiles: R (reptile), R (reptile), R (reptile), R (reptile), R (reptile), R (reptile), R (reptile), R (reptile) Snails: S (snail), S (snail), S (snail), S (snail), S (snail), S (snail), S (snail), S (snail), S (snail), S (snail) ADD codes for post-mortem status of dead animals: D (dead), D (dead), D (dead), D (dead) and only in terms of: call, footprint and track-dropping (e.g. CTR, LTR, BTR)</p>

Convert Data into Information

DATA

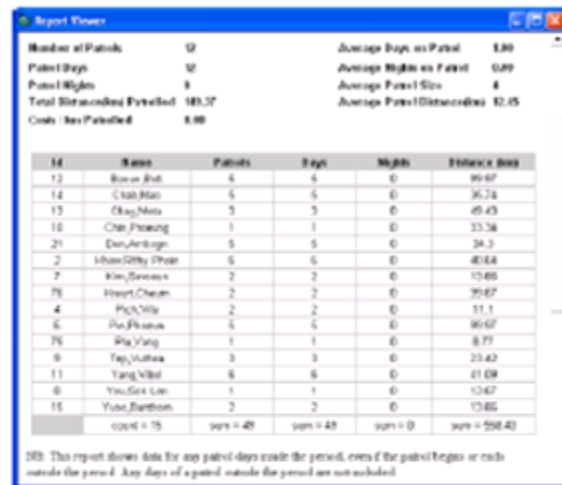

INFORMATION

GPS

MIST-GIS

Note: This report shows data for all patrol days inside the period, even if the patrol begins or ends outside the period. Any days of a patrol outside the period are not included.

Worksheet grid with various data columns and formulas. Headers include 'id', 'Name', 'Patrols', 'Days', 'Nights', 'Patrolance Miles'. The grid contains several rows of data and formulas.

Datasheets

Reports

- White-shouldered Ibis Nest
- White-winged Duck Sighting
- Giant Ibis Sighting
- Green Peafowl Sighting
- Black-necked Stork Sighting
- Sarus Crane Sighting
- Greater Adjutant Sighting
- Lesser Adjutant Sighting
- ipmrc_villages
- river_ipmrc
- ipmrc_woods
- ipmrc_care_zone
- ipmrc_tour

Maps

Example of information produced from the data:

- Where illegal activities occur
- Trend in illegal activities
- Which species are in the park
- Distribution and dynamic of these species

But also:

- How good is your coverage of the PA
- Where you should concentrate your effort

Standard outputs from the database include

Reports

- Spatial distribution of wildlife depending on the ecological factors
- Information on patrols (time and distance patrolled etc.)
- Illegal activities (indices and numbers)
- Key wildlife species (indices, numbers and population structure)
- PAC Data
 - **Crop destruction**
 - **Predation**
 - **Human threat**
 - **Human injury**
 - **Human death**

Report output

General information on Patrols

Information for each staff participating in patrols

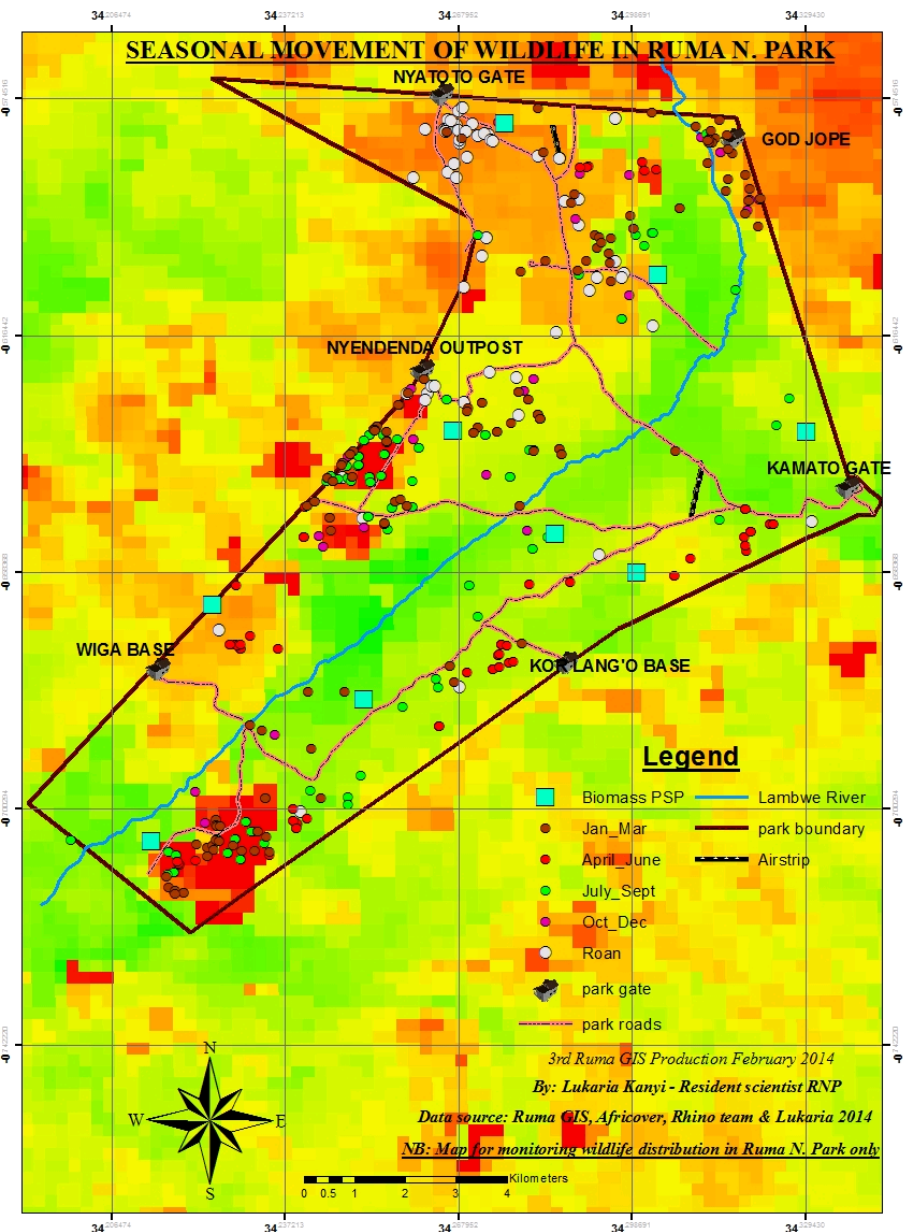

Report Viewer

Number of Patrols	12	Average Days on Patrol	1.00
Patrol Days	12	Average Nights on Patrol	0.00
Patrol Nights	0	Average Patrol Size	4
Total Distance(km) Patrolled	149.37	Average Patrol Distance(km)	12.45

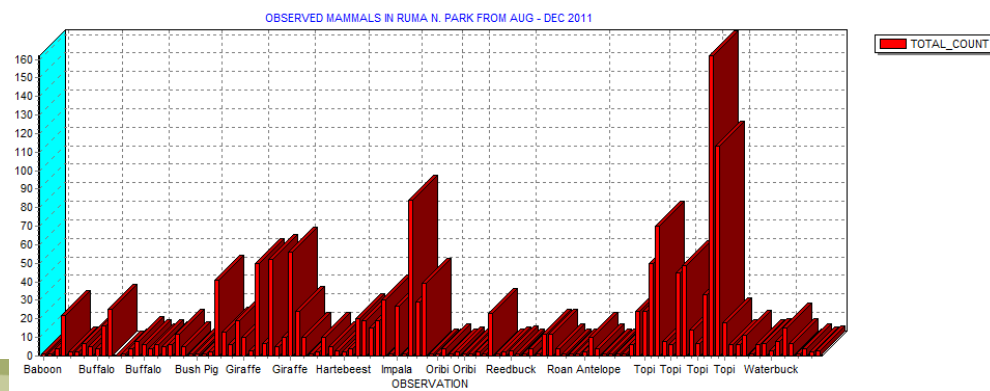

Id	Name	Patrols	Days	Nights	Distance (km)
12	Boeun,Boti	5	5	0	99.97
14	Chab,Mao	5	5	0	35.74
13	Chay,Meta	3	3	0	49.43

8	You,Sok Lim	1	1	0	13.67
15	Yuos,Bunthorn	2	2	0	13.66
count = 15		sum = 49	sum = 49	sum = 0	sum = 558.43

NB: This report shows data for any patrol days inside the period, even if the patrol begins or ends outside the period. Any days of a patrol outside the period are not included.

Application output

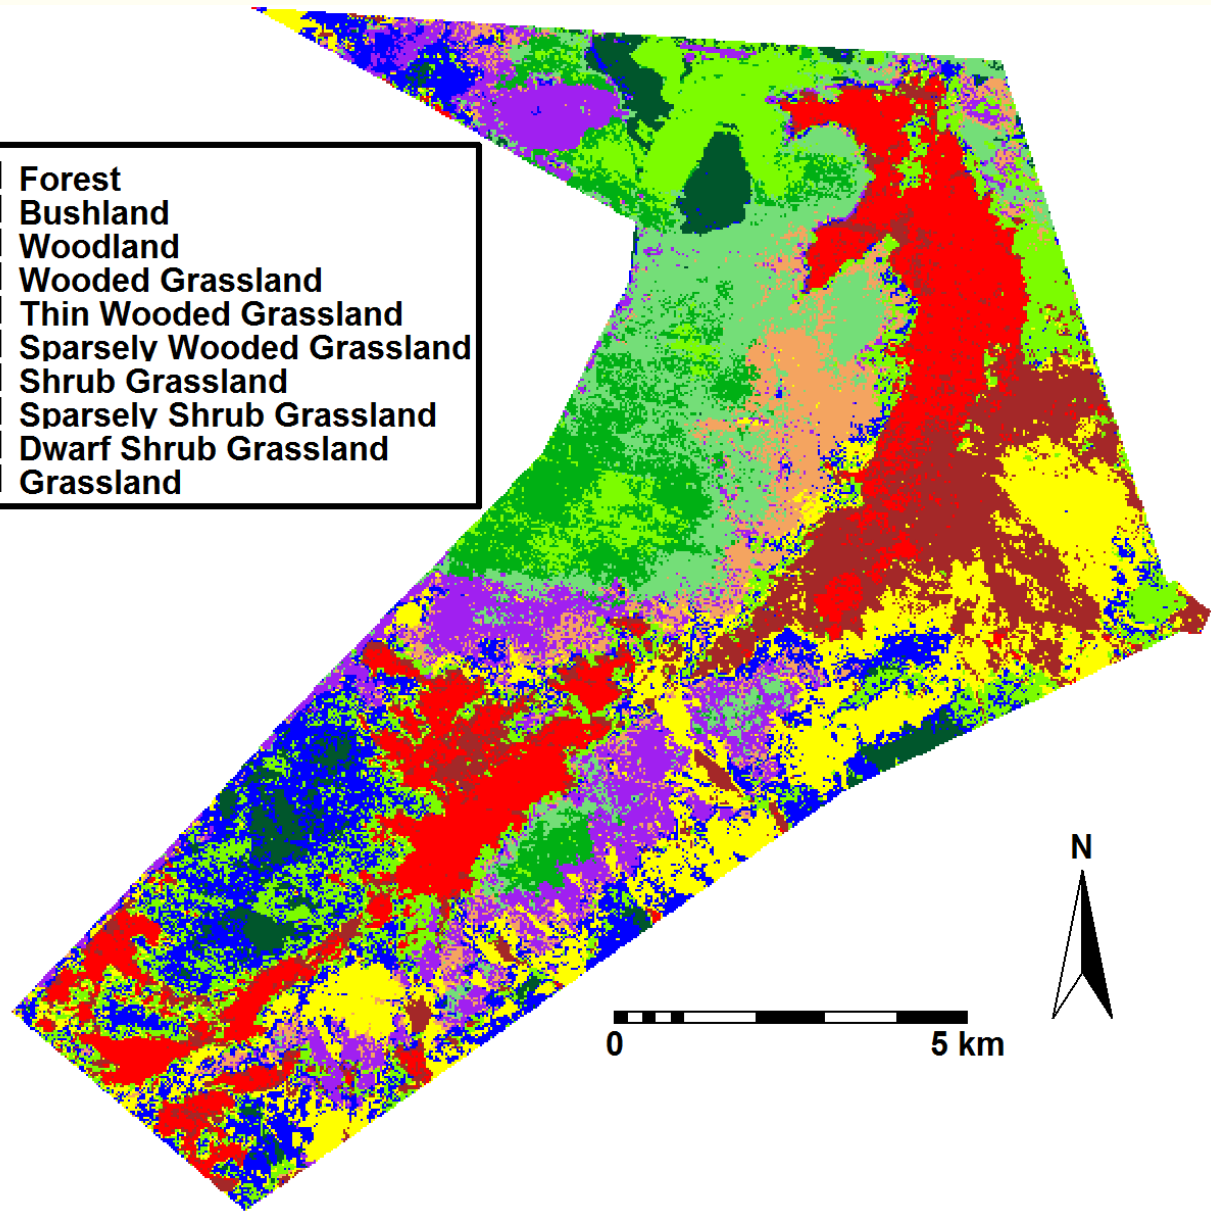

ANIMAL DISTRIBUTION IN RUMA NATIONAL PARK

- Forest
- Bushland
- Woodland
- Wooded Grassland
- Thin Wooded Grassland
- Sparsely Wooded Grassland
- Shrub Grassland
- Sparsely Shrub Grassland
- Dwarf Shrub Grassland
- Grassland

Vegetation map of Ruma National Park derived from 2005 ETM+ Landsat Image and updated with ground truth of 2008

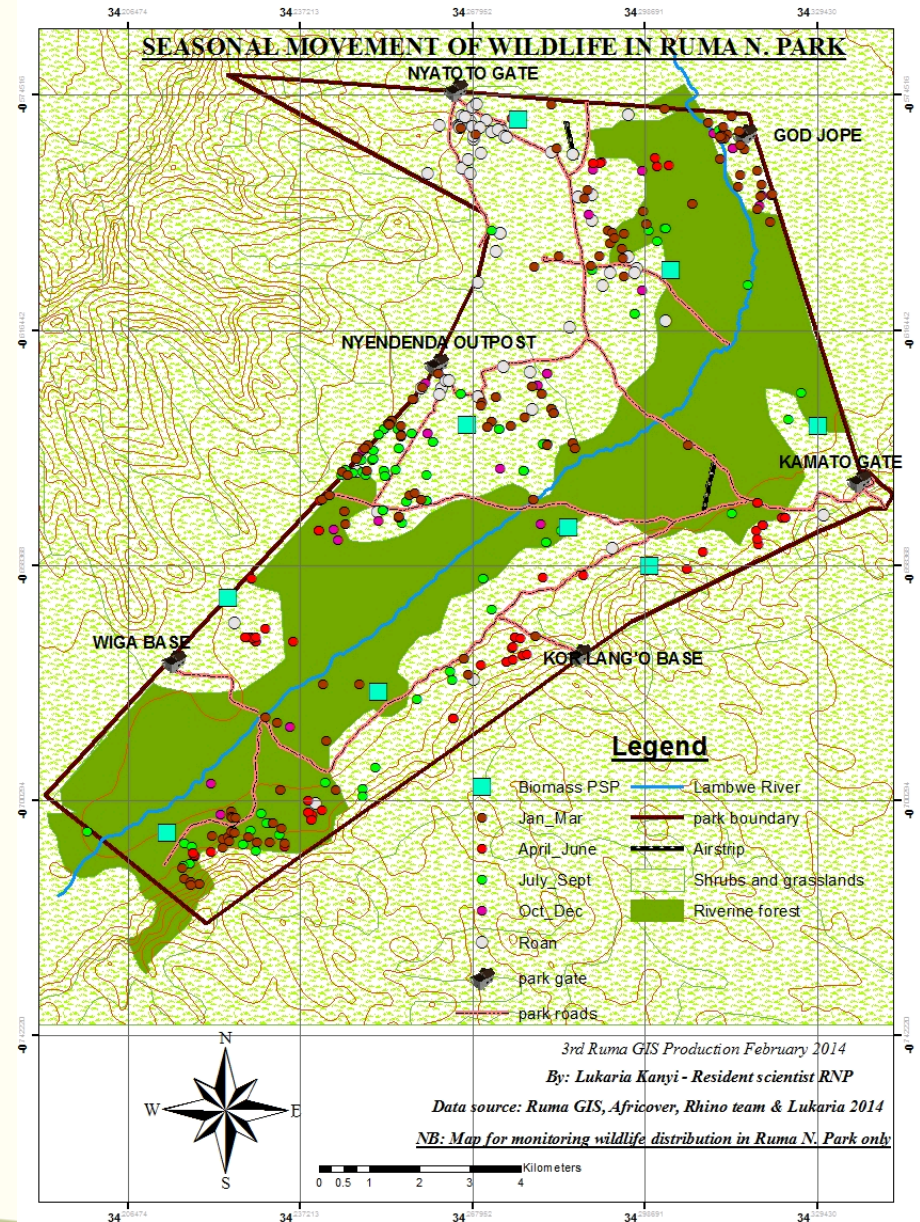

0 5 km
