

Critical Social Interactions that Promote Preservation of Landscape Function

Maurice Wanjala
Kipsaina Crane and Wetlands Conservation Group
Kesogon, Kenya

Wetland encroachment – the challenge being addressed

Promoting human-crane co-existence – the long-term goal

Environmental education involves schoolkids and adults

Sensitizing teachers first is part of required innovation

Catching them young is critical in schools outreach

Building social networks - representatives from different sites

Jika stoves from clay – providing alternative livelihoods

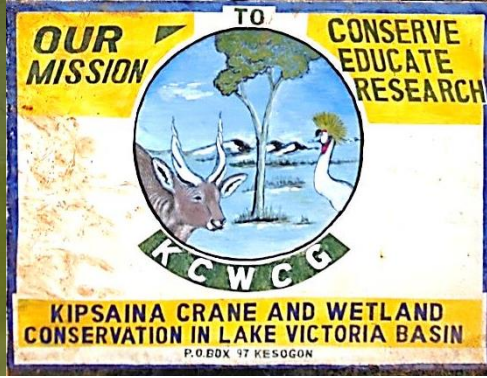

Community-agreed regulations for wetland protection

Erosion in the Saiwa wetland catchment

Tree seedlings – potentials for obtaining food security and wetland ecosystem restoration

**Thank You for the Opportunity to Provide
These Perspectives on Resource
Conservation and Stakeholder Interactions**

**If Conservation is the Answer,
What is the Problem?**
